LIGHTING SOLUTIONS

FEATURES

The EM-SIGN 3 is a high-quality emergency exit sign range that offers a bright 28m viewing distance. Its even illumination across the legend panel ensures maximum visibility in the event of an emergency.

Available in suspended, surface and recessed-mounted options.

EM-SIGN 3 features a unique method of fitting the legend panel screens onto the double-sided, acrylic blades. The EC or ISO legend panels are available in arrow up, arrow down, arrow left or arrow right. The panels are supplied as 'same type' sets of two. When ordering please confirm your panel requirements.
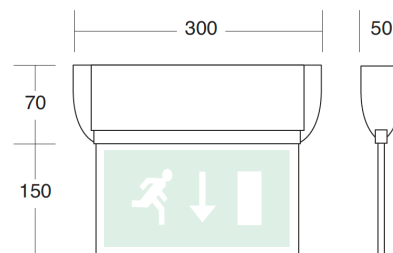

EM-SIGN 3 is specified in a non-maintained or maintained emergency operation. DALI/Self-Test options include an integral DALI self-test gear or standard DALI operation which is fully interoperable when connected to an existing DALI control system.
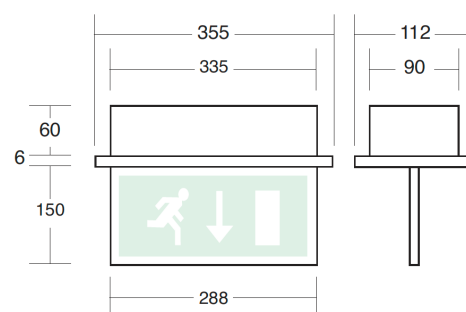

SPECIFICATION

Installation	Recessed | Surface | Suspended
Viewing Distance	28m
Input Voltage	230V 50Hz
Colour Temperature CCT	4500K
Power (Maintained)	Up to 4.4W
Power (Non-Maintained)	Up to 3.1W
Duration	3 hours
Battery Type	4.8V 0/9Ah NiCd
IP Rating	IP20
Material	Extruded Aluminium
Finish	Surface – Silver Aluminium Recessed – White
Dimensions	Surface – W 300mm x H 220mm Recessed – W 355mm x H 210mm
Legend Panels	Arrow Up | Arrow Down | Arrow Left | Arrow Right
Temperature	0°C ~ 25°C
Weight	3kg
Conformity	Class I, UKCA
Warranty	5 Years

DIMENSIONS

Surface: the surface and suspended solutions connect with fixing brackets that retain the standard luminaire body via quick release spring clips. For the suspended installation, 1m wire suspension cables are provided.

Recessed: the housing has adjustable spring clip arms to simplify installation into different thickness supporting surfaces.
