## Design & Technical Services

We offer practical design and technical support to help bring your lighting schemes to life. From lighting layouts and 3D visuals to performance specifications, we work closely with your project teams to ensure every detail is clear and complete.

## Impact Lighting Solutions

We are an LED lighting solutions company based in Oxfordshire. We supply high-quality lighting products and work closely with architects, consultants and contractors to deliver reliable solutions for commercial and architectural projects. Our focus is on quality, consistency and lighting that performs reliably in real-world environments.

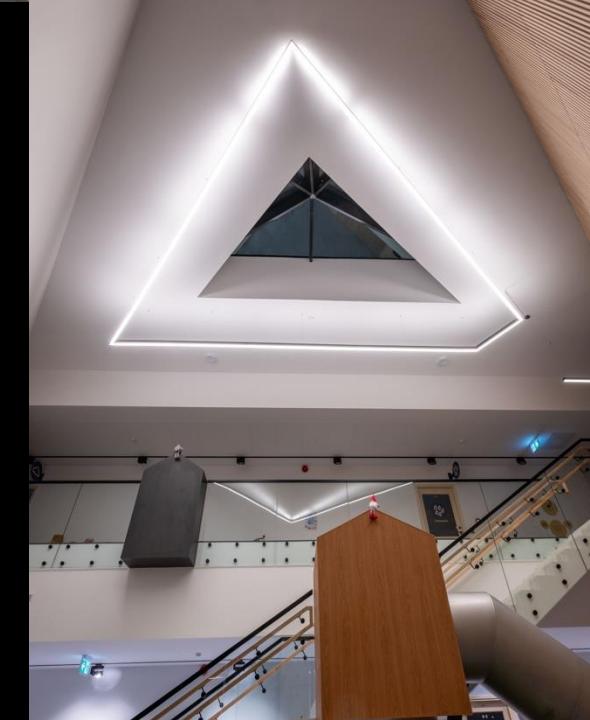

## Project Delivery

From design sign-off through to site delivery and installation support, we keep projects running smoothly. Our team manages coordination, logistics and communication to ensure your lighting arrives on time, installs efficiently and continues to perform reliably with our ongoing after-sales support.

## Custom Lighting

Our custom lighting solutions are designed and built around each space. We source high-quality components, carefully prepare materials and build products to meet project requirements. From feature installations to architectural details, we create lighting that works for you.

# MODERN WORKSPACES

Performance-led lighting for contemporary work environments.

**ILO**  
Linear Lighting Systems
